

Resource Recovery Industry Development Program

Stream One: Resource Recovery Grants Fund

Guidelines

September 2018

The Department of State Development, Manufacturing, Infrastructure and Planning improves productivity and quality of life in Queensland by leading economic strategy, industry development, infrastructure and planning, for the benefit of all.

1. Introduction

On 20 March 2018, the Queensland Government announced the development of a comprehensive waste management strategy underpinned by a waste disposal levy to increase recycling and recovery, create new jobs and provide the resource recovery and waste sector with the policy certainty it needs to invest in new and expanded resource recovery facilities and infrastructure in Queensland.

The [Transforming Queensland's Recycling and Waste Industry Directions Paper](#), and a Recycling and Waste Management Stakeholder Advisory Group is providing advice and guidance to the Queensland Government to help inform the development of the new waste management strategy which aims to:

- attract industry investment and innovation;
- create new jobs for Queensland communities;
- have no direct impact on Queensland households;
- deliver long-term value to the environment; and
- move Queensland towards a circular economy.

It is proposed that a waste disposal levy be introduced in March 2019 and be initially set at \$70 per tonne of general waste sent to landfill. The levy will reduce the incentive to dispose of waste to landfill, make material that is currently disposed of more attractive to be diverted as a feedstock for bioindustrial industries and create new industries that manufacture products for re-use, recycling and reprocessing. The levy will provide source funding to implement the [Resource Recovery Industry Development Program](#).

1.1 The Resource Recovery Industry Development Program

The Resource Recovery Industry Development Program (RRIDP) will provide financial assistance for the development of projects aimed at:

- facilitating waste avoidance, landfill diversion (including stockpile diversion / reduction) and recycling activities;
- enhancing economic development opportunities led by building advanced processing and technology capacity;
- facilitating and encouraging waste infrastructure investment; and
- promoting regional market and job development opportunities.

The RRIDP offers three streams to address projects of varying scales and areas of focus. **These guidelines are for Stream One, the *Resource Recovery Grants Fund*.**

Stream One: Resource Recovery Grants Fund ([these guidelines](#))

The first stream is a capital grants stream with dollar-for-dollar grants available from \$50,000 to \$5 million to provide funding for infrastructure projects which will enhance or build new facilities or for capital investments in new processing and technological capabilities that align with the RRIDP and its objectives.

Stream Two: Resource Recovery Project Fund

This is a broader financial incentives stream to attract or expand major resource recovery projects in Queensland. A project supported under Stream Two will deliver significant landfill diversion and resource recovery outcomes. Stream Two is well suited to projects which have the potential to result in significant benefits to Queensland, relative to the State's contribution. Applications will be considered on a case by case basis, with a successful project rated as of exceptional merit relative to the key objectives of RRIDP.

Stream Three: Resource Recovery Investment Pipeline Fund

The third stream is funding for studies for proposed projects that wish to deploy demonstrated technology but require further detailed technical and professional investigations to assist with resource recovery infrastructure investment decisions in Queensland.

2. Stream One: The Resource Recovery Grants Fund

2.1 Overview

The **Stream One: Resource Recovery Grants Fund** (Stream One) will encourage and accelerate investment in new and improved resource recovery facilities and infrastructure which will return valuable resources back into the productive economy, divert waste from landfill and provide numerous environmental and social benefits including protection of land, water and air quality and reduced amenity impacts on local communities near landfill sites. Stream One will support and accelerate new job creation and economic development particularly in regional areas, by localising processing activity, and keeping resources (materials and energy) in local economies.

Grants from \$50,000 to up to \$5 million will be provided towards capital investment in resource recovery infrastructure, to be matched (or exceeded) by co-funding from the applicant. This will be a rounds-based stream which will be open to Applications twice per year. Applications will follow a two-stage process, with the first stage being an expression of interest (EOI) which assesses eligibility. Those projects that meet eligibility will then be invited to submit a Detailed Application. More details on eligibility and assessment are included in sections 2.3 – 2.6.

All project proposals seeking financial assistance through Stream One will need to meet a clear set of eligibility criteria, and any financial assistance provided will be underpinned by the Department's approval processes including financial and economic modelling, contract management and reporting framework to ensure the benefits from all financial incentives flow through to the wider community and result in a net benefit for Queensland.

2.2 Objectives

The key objectives of Stream One are to:

- grow Queensland's biofutures and resource recovery industries and attract investment in new infrastructure;
- encourage proponents to consider Queensland as a viable location to establish their resource recovery project;
- create new jobs including skilled jobs in innovation and new industries, and new jobs in regional areas; and
- move Queensland towards a circular economy, adding value to waste resources and retaining them within local economies.

2.3 Eligibility

2.3.1 Applicants

To be eligible to apply, applicants must:

- be a legal entity* with an active Australian Business Number (ABN) or Australian Registered Business Number (ARBN);
- propose capital investment in resource recovery infrastructure to be located in Queensland;
- have obtained internal approval** to make the Application, including approval to co-fund the project to at least 50 per cent of the eligible capital costs, before applying for a grant;
- have the financial and technical capacity to deliver the resource recovery project; and
- have a history of effective regulatory compliance.

*The applicant organisation may be a business, local government (including local government owned / controlled organisations) or a not-for-profit or non-government organisation. The applicant may also be in the process of establishing a business for the purpose of launching a resource recovery project.

Regional groups of councils and partnerships between industry and local government are also encouraged to apply, but one organisation should be identified as the lead applicant and administrator of the project. Individuals and sole traders are not eligible.

** For local government applicants, this will be an endorsement of the project from elected members. For other organisations, this may require sign-off from executive management or the board.

2.3.2 Projects

Eligible Projects

To be eligible, a project must meet all of the following eligibility criteria:

- contribute to the growth of the biofutures and resource recovery industries in Queensland;
- be located in Queensland;
- recover waste materials that are currently being landfilled, or materials that are recovered to low value outlets;
- deliver new or improved resource recovery infrastructure;
- be capable of maintaining the delivery program for the project provided in the Application;
- be able to secure all necessary planning approvals / licences within the delivery timeframe;
- be unlikely to proceed at this time without financial acceleration; and
- use only technology and solutions that have successfully demonstrated commercial capability in the market.

Stream One will fund eligible costs up to 50 per cent of total eligible project costs.

This requires a minimum confirmed financial co-contribution of 50 per cent from other contributors, which may include funding from other sources outside of the Department of State Development, Manufacturing, Infrastructure and Planning. This could be from other Queensland Government agencies, the Australian Government or local government, as well as contributions from non-government sources. Project applicants are required to contribute a minimum 25 per cent towards the project.

Potential projects may include but are not limited to:

- new or expanded collection and transfer infrastructure, for example
 - kerbside collection systems
 - commercial waste collection systems
 - resource recovery centres and recycling drop off centres;
- new or expanded organics processing, for example
 - enclosed or in-vessel composting systems
 - anaerobic digestion, wet or dry;
- new or expanded recovery / sorting facilities, for example
 - upgrades to recycling facilities to meet tighter product quality standards
 - upgrades to mixed waste processing facilities;
- recovery of construction and demolition waste, for example
 - upgrades to existing facilities
 - new facilities where there is limited capacity;
- reprocessing, for example
 - refining of sorted recyclable material into higher quality products
 - manufacturing of new products from sorted recyclables
- new bioprocessing facilities, for example
 - processing bio-waste into reusable resources or energy;
- energy-from-waste, for example
 - energy generated from single stream or mixed wastes;
- industrial biotechnology and bioproducts infrastructure, for example
 - co-generation energy production
 - biofuel production
 - high value output bioproducts;
- on-site and precinct solutions, for example
 - Small scale or precinct based treatment and recovery that reduce waste generated by a specific business or group of businesses.

Where more than one project is proposed by an applicant, the applicant should consider if the projects are directly linked and mutually dependent and could therefore be submitted as a single project Application.

Ineligible Projects

The following projects are not considered eligible for funding and will not be considered under Stream One:

- landfill projects – construction of new landfills or landfill cells, improvement of existing landfills (excluding source separation equipment), new landfill equipment, capping of landfills or rehabilitation of legacy landfills;
- projects that have already commenced or are planned to commence regardless of financial support from the Government, for example:
 - the applicant is contracted to provide the resource recovery infrastructure or service that is proposed, or to supply the recovered resources that are proposed to be produced by the project
 - funding has been approved and committed to the project regardless of the grant
 - construction has commenced, or contracts have been executed for supply / construction of the facility;
- projects which would be clearly commercially viable and attractive in the short-term without financial acceleration;
- projects undertaken outside of Queensland;
- infrastructure that is primarily intended to process wastes imported from jurisdictions outside of Queensland;
- projects which have not yet demonstrated the commercial capability of the technology being deployed;
- projects not directly resulting in new infrastructure investment, for example education and behaviour change programs, market development, strategy development, and feasibility studies;

2.3.3 Project Costs

Project costs to be eligible for consideration must be auditable and must be capital costs for project specific investments such as for new, upgraded or expanded resource recovery facilities, large-scale technologies, or for the purchase and installation of fixed plant and equipment required to fully commission new infrastructure.

The following items will not be funded and should be excluded from the estimate of eligible project costs for co-funding:

- project development costs such as options analyses, feasibility studies, business case development and due diligence;
- legal costs;
- any expenditure incurred prior to the project commencement date agreed under the funding agreement;
- development approvals and environmental licence application costs, including any impact assessment studies that may be required;
- civil works outside the direct project site such as road and drainage upgrades;
- site acquisition costs such as purchase or lease costs and any site rehabilitation costs;

- leased equipment;
- operations and maintenance costs, including working capital;
- financing costs;
- existing plant and equipment which may be utilised in the new project (these should be identified as in-kind contributions);
- grant application, monitoring and administration costs (including any consultant support engaged by the applicant);
- promotion and advertising costs;
- compliance with regulation and licence conditions;
- offtake market development costs;
- education and information campaigns;
- contingency allowances (but it is considered prudent for these to be included in the total project budget).

In-kind contributions from the applicant are welcomed but will not be counted toward the applicant's capital co-contribution.

The applicant is encouraged to demonstrate that local suppliers and contractors will be engaged wherever reasonably practicable. Where significant expenditure outside of Queensland is required and unavoidable (e.g. purchase of specialised equipment not available in Queensland), this should be identified and explained in the Application. The Queensland Charter for Local Content may apply.

2.4 How to apply

Notification of the funding round opening will be provided via multiple channels including email, social media and advertising. Stream One is a two-stage assessment process where proponents will be able to submit an expression of interest (EOI) and, if eligible, will then be invited to submit a detailed application (Detailed Application). Four weeks will be allowed for proponents to submit an EOI, followed by a four-week assessment period. A further four weeks will be allowed for proponents to submit a Detailed Application, followed by an eight to twelve-week assessment period depending on demand.

2.5 EOI stage

Interested proponents will be able to visit a Departmental website to submit an EOI for their proposed project using the online portal.

Each EOI (including the Materials Flow Calculator) will be checked for eligibility against the criteria set out in section 2.3 of these guidelines. If the EOI does not satisfy the eligibility criteria the applicant will be notified. Feedback will be provided upon request.

If the EOI satisfies the eligibility criteria the applicant will be invited to proceed to the Detailed Application stage.

2.6 Detailed Application stage

A Detailed Application form will be forwarded to the applicant for completion. It will request the following information:

- project background, including the current situation and what problems the project will address;
- project description, including site details, technologies proposed, processing capacity and waste flows. Waste flows refer to inputs, output of recovered materials and / or energy products and residual waste to landfill;
- project viability, particularly in relation to feedstock markets for waste supply and offtake markets for recovered products;
- a financial evaluation to ensure the project is commercially viable and will provide a return on investment, and for the evaluation panel to assess the robustness of key financial assumptions (costs and revenues);
- project plan, including key stages and milestones of the project as well as roles and responsibilities of key parties / staff. It will also include management systems and quality control approaches, and an outline of procurement strategies;
- project risks, including key project risks, potential consequences and mitigation measures that will be put in place to manage the risks. This should include risks associated with obtaining Native Title, land tenure and planning approvals; and
- key benefits, expected outcomes and measures of success.

Applicants will also be required to demonstrate how the project satisfies the eligibility criteria in section 2.3 of these guidelines.

Detailed Applications must contain all information required to be submitted at the time of lodgement.

Applicants will receive an acknowledgement of receipt of the Detailed Application by email within three business days of the closing date.

All Detailed Applications will be scored in a competitive, merit-based process against the eligibility and assessment criteria. The Department may engage consultants or specialist advisors to assist with the assessment of proposals against the eligibility and assessment criteria including probity checks and technical assessments.

Applicants may be contacted during the assessment process to clarify information provided in the Detailed Application and/or to request further information to enable a due diligence and probity assessment.

There is no guarantee of approval at any stage in the process, and applicants will be notified in writing of the outcome of their Detailed Application. In the event of oversubscription to Stream One, Detailed Applications will be considered relative to the total funding available.

The State reserves the right to award grant funding in a different amount or with alternative conditions to that requested by the applicant.

The State may make public announcements regarding successful Applications.

Advice and support

A list of Frequently Asked Questions (FAQ) will be available once Stream One opens to assist with preparation of Applications.

Questions and responses to questions asked after Stream One opens will be added to the FAQ. The Department may in its discretion determine not to publish questions and responses where they are project or Application specific or do not have general application. Applicants should check the FAQ for updates prior to submitting their EOI and Detailed Application.

The Department is not able to directly assist in the preparation of Applications.

The decision in relation to an Application is final and may not be appealed. If however, an applicant has any concerns in relation to the application or assessment process, an applicant may raise their concern at biofutures@dsmip.qld.gov.au and this will be considered.

The Department welcomes feedback on the RRIDP. Further information about providing feedback, compliments or complaints to the Department can be found [on our website](#).

2.7 Assessment criteria

Proposals will be assessed against the following weighted criteria which must be addressed in the Detailed Application:

- contribution to the development of an improved, more robust resource recovery and biofutures industry, for example the project will contribute to transitioning Queensland towards a circular economy (20%);
- viability of the project, for example the applicant has good access to feedstocks and the financial evaluation is sound (40%);
- project delivery and risk management, for example the applicant is resourced to successfully implement and manage the project (25%);
- value for money, for example the degree to which the project delivers value for money to the Queensland Government through economic, social, environmental and / or regional benefits to Queensland (15%).

2.8 Funding arrangements

Successful applicants will be required to execute a funding agreement with the State. This funding agreement will outline the terms of the proposed funding and detail the milestones to be achieved by the applicant.

Funding will be provided in instalments paid in arrears based on agreed milestones. Payments will be dependent on receipt of satisfactory milestone reports, which will be subject to verification by the Department.

Applicants must propose payment milestone events and grant payment amounts within their Detailed Application form.

Recipients will be required to provide regular progress reports and milestone completion reports to the Government which demonstrate that the project is being delivered as agreed on schedule, and a project completion report. Templates and requirements for these will be provided to successful applicants.

The Government reserves the right to undertake an audit of projects to monitor progress and / or appoint an independent advisor to undertake an assessment of projects.

2.9 Tax obligations

Grants may be treated as assessable income for taxation purposes and GST may also be applied. The State does not provide advice to applicants and recommends applicants seek independent professional advice on their tax obligations.

2.10 Program evaluation

As a new initiative of the Queensland Government, the RRIDP will be continuously monitored and reviewed, at a minimum annually, to ensure that the program effectively achieves its objectives. As such, these guidelines may be updated for future rounds after a funding round has closed.

3. Communications

3.1 Media

Once Stream One is open, all media enquiries or public announcements relating to Stream One will be coordinated and managed by Department's media team. Where possible, media and communications about projects will be undertaken jointly with successful applicants.

Applicants will be required to:

- seek and obtain the Department's approval before making public statements, or contacting the media, regarding successful or unsuccessful Applications through Stream One;
- provide the Department with at least 25 business days' notice of any proposed media event; and
- provide any proposed media or public statement to Department for approval prior to its release as well as making any changes or amendments to the form, content or manner reasonably requested by the Department.

3.2 Confidentiality

The Department will maintain strict controls in relation to the management of confidential information provided by applicants and all internal documentation produced in relation to the administration of Stream One.

Applicants must keep confidential any dealings with the Department about their Application, including any funding offered, but may make disclosures to advisors who are under an obligation of confidentiality or if required by law.

The State reserves the right to publicly disclose the names of applicants, information about funding granted and details about the anticipated economic outcomes and benefits to the State.

The State may also disclose confidential information of, or provided by, the applicant:

- if required to be disclosed by law;
- to its advisors;
- to comply with or meet applicable standards for accountability of public money or established governmental policies, procedures and protocols; or
- to a government agency.

3.3 Contact details

For enquiries or assistance about these guidelines, please contact the Department of State Development, Manufacturing, Infrastructure and Planning:

Email: rripd@dsmip.qld.gov.au

Phone: 13 QGOV (13 74 68)

4. Glossary

Application – means an application (or relevant part of an application) made to Stream One, and includes an EOI, a Detailed Application and any other supporting or additional information in whatever form provided by the applicant in connection with its EOI or Detailed Application to Stream One.

Circular economy – a circular economy is an alternative to a traditional linear economy (make, use, dispose) in which we keep resources in use for as long as possible, extract the maximum value from them whilst in use, then recover and regenerate products and materials at the end of each service life.

Department – the Queensland Department of State Development, Manufacturing, Infrastructure and Planning.

Detailed Application – a detailed application for funding under Stream One as set out in section 2.6.

EOI – an expression of interest for funding under Stream One as set out in section 2.5.

Feedstock – raw materials sourced as inputs for the process.

Offtake market – the market in which producers of a resource sell.

Resource Recovery – when energy, a material, or a product is taken from waste and re-used.

State – the State of Queensland.

Stream One – the Stream One: Resource Recovery Grants Fund.

5. Terms and Conditions

5.1 Reservation of Rights

The State reserves the right to administer Stream One and conduct the process for the assessment and approval of Applications in connection with Stream One in such manner as it thinks fit and to:

- a) change the structure, procedures, nature, scope or timing of, or alter the terms of participation in, the process or overall RRIDP (including timeframes and submission and compliance of Applications);
- b) consider or accept or refuse to consider or accept any Application which:
 - i. is lodged other than in accordance with these guidelines;
 - ii. is lodged after the relevant closing date for lodgement;
 - iii. does not contain the information required by these guidelines; or
 - iv. is otherwise non-conforming in any respect;
- c) vary or amend the eligibility criteria or assessment criteria set out in these guidelines;
- d) take into account any information from its own and other sources (including other Government agencies or advisors);
- e) accept or reject any Application, having regard to these guidelines, the eligibility criteria and the assessment criteria or any other item, matter or thing which the State considers relevant, including the limitations on the funds available for Stream One;
- f) give preference by allocating weighting to any one or more eligibility criteria or assessment criteria over the other;
- g) seek clarifications or additional information from, or provide clarifications or additional information to, negotiate or deal with, or seek presentations or interviews from, any applicant, without doing or requiring the same from all or any of the other applicants;
- h) conduct due diligence investigations in respect of any applicant and subject Applications to due diligence, technical, financial and economic appraisals;

- i) require an applicant to clarify or substantiate any claims, assumptions or commitment contained in an Application or provide any additional information;
- j) terminate further participation of any applicant in the application process for Stream One;
- k) terminate or reinstate Stream One or any process in Stream One;
- l) not proceed with Stream One in the manner outlined in these guidelines, or at all;
- m) allow the withdrawal or addition of any applicant after the closing date; and
- n) conduct negotiations with any one or more applicants after Applications have been lodged.

Where, under these guidelines, it is stated that the State may exercise a right or discretion or perform any act or omit to perform any act, then unless stated otherwise the State may do so at its sole and absolute discretion and will not be required to act, or be restrained from acting, in any way or for any reason nor to take into account the interests of any third party (including the applicants).

If the State does exercise any of its rights under these guidelines the State may inform any or all applicants. The State will not, however, be under any obligation to do so.

5.2 Relationship

The State's obligations regarding the application process are limited to those expressly stated in these guidelines.

Subject to section 5.7, no contractual or legal relationship exists between the State and an applicant in connection with Stream One, these guidelines or the application process.

An applicant, or its representatives:

- a) has no authority or power, and must not purport to have the authority or power to bind the State, or make representations on behalf of the State;
- b) must not hold itself out or engage in any conduct or make any representation which may suggest to any person that the applicant is for any purpose an employee, agent, partner or joint venture with the State; and
- c) must not represent to any person that the State is a party to the proposed project (other than as a potential funder subject to the application process and confidentiality obligations detailed in these guidelines).

5.3 Participation at applicant's cost

Each applicant participates in Stream One at its own cost and risk.

To the extent permitted by law, no applicant will have any claim of any kind whatsoever against the State (whether in contract, tort (including negligence), equity, under statute or otherwise) arising from or in connection with:

- a) any costs, expenses, losses or liabilities suffered or incurred by the applicant in preparing and submitting its Application (including any amendments, requests for further information by the State, attendance at meetings or involvement in discussions) or otherwise in connection with Stream One;
- b) the State at any time exercising or failing to exercise, in its absolute discretion, any rights it has under or in connection with Stream One; or
- c) any of the matters or things relevant to its Application or Stream One in respect of which the applicant must satisfy itself, including under these guidelines.

Without limiting the foregoing, if the State cancels or varies Stream One at any time or does not select any applicant following its assessment of the Applications, or does (or fails to do) any other thing referred to under these guidelines, no applicant will have any claim against the State arising from or in connection with any costs, expenses, losses or liabilities incurred by the applicant in preparing and submitting its Application or otherwise in connection with or in relation to (whether directly or indirectly) Stream One.

5.4 Applicant to make own enquiries

These guidelines have been prepared to give potential applicants background information in relation to Stream One. These guidelines do not, and do not purport to contain all of the information that applicants may require in reaching decisions in relation to whether or not to submit an Application. Applicants must form their own views as to what information is relevant to such decisions and obtain their own independent legal, financial, tax and other advice in relation to information in these guidelines or otherwise made available to them during the application process.

The State accepts no responsibility whether arising from negligence or otherwise (except a liability that cannot lawfully be excluded) for any reliance placed upon the information supplied by it in connection with Stream One or interpretations placed on the information by applicants.

5.5 Intellectual Property

Any intellectual property rights that may exist in an Application will remain the property of the applicant or the rightful owner of those intellectual property rights. Any part of an Application considered to contain any intellectual property rights should be clearly identified by the applicant.

The applicant grants to the State (and will ensure that relevant third parties grant) a non-exclusive, irrevocable licence to use and reproduce the intellectual property for the purpose of administering Stream One.

5.6 Privacy

In this section, **Personal Information** has the meaning given to that term in the *Information Privacy Act 2009* (Qld).

Personal Information provided by applicants may, in the course and for the purposes of assessment of the Application, be disclosed to the State's associates or project stakeholders.

If any applicant collects or has access to any Personal Information in connection with its Application or Stream One, the applicant must comply, in relation to that Personal Information:

- a) (as if it were the State) with the Information Privacy Principles in the *Information Privacy Act 2009* (Qld); and
- b) with all reasonable directions of the State.

5.7 Acceptance

By submitting an Application, each applicant:

- a) warrants to the State that the information contained in its Application is accurate and complete as at the date on which it is submitted and not by omission misleading, and may be relied on by the State in determining whether or not to provide financial assistance to the applicant under Stream One;
- b) undertakes to promptly advise the State if it becomes aware of any change in circumstances which causes the information contained in its Application to become inaccurate or incomplete in a material respect;
- c) acknowledges that the State will rely on the above warranty and undertaking when evaluating the Application;
- d) acknowledges that the State may elect to remove an applicant or elect not to further consider an Application at any stage as a result of a material change to the information presented in an Application;
- e) acknowledges that the State may suffer loss or damage if the applicant breaches the above warranty and undertaking; and
- f) is taken to have accepted these guidelines, including the terms and conditions, and warrants for the benefit of the State it will not breach these guidelines or seek to bring any claim, of any kind whatsoever, against the State which is precluded by these guidelines.
